

Save Inches & Glide Equipment Easily

THE CASTER ALTERNATIVE

- ▶ KEGlide heights are easily modified to gain, or drop, a few inches for height clearances
- ▶ Trusted USA produced material makes equipment glide across floors & easy to move for cleaning and service
- ▶ KEGlides make zero clearances for adjacent equipment possible
- ▶ More durable than casters, KEGlides have no parts to fail
- ▶ Bolt size and thread count can be matched to existing attachment method

Height and adjacent clearances are adjusted so equipment fits under hoods and maximizes space.

KEGlides lower equipment height for undercounter use and create mobility for countertop equipment without damaging surfaces.

PROVEN INDUSTRIAL STRENGTH

KEGlides are made of a high load, natural lubricity, virtually indestructible USA sourced polymer so it moves easily over most flooring surfaces. Glides can withstand weight tolerances up to 5000lbs and temperatures variants from -58° to 194°F and are resistant to chemical solvents.

STOCKED GLIDES FOR OEM USE

Counter Glides

The female Counter Glide replaces the adjustable bullet foot in 4" equipment leg to ease movement and eliminate damage to countertop surfaces (s/s, solid surface, etc). Griddles, hotplates, steamers, warming equipment, etc.

Ref # 80003

GF-1.25-.375-16-0.50

Light Duty Glides

Male threaded Glide with a 1/2" x 13 threaded bolt. The caster alternative for light duty equipment to ease movement of equipment for cleaning and servicing. Often used to overcome undercounter clearance issues.

Ref # 80004

GM-2.50-0.50-13-1.25

Post Glides

Male threaded one piece Glide fits 1" posts for all wire shelving. This Glide manually levels and eliminates staining, chipping, and scarring damage to floor surfaces commonly caused by the metal shelving foot.

Ref # 80014

GM-1.50-.375-16-0.50

HD Glides - Short

Male threaded HD Glide with 5/8" x 11 threaded bolt. The caster alternative to ease of movement of equipment for cleaning and servicing, and to overcome clearance issues. Additional sizes available.

Ref # 80009

GM-2.50-.625-11- 1.25

HD Glides - Tall

Male threaded HD Glide has the same 5/8" x 13 threaded bolt as the Short model, but with a 3" Glide height. The caster alternative to ease of movement of equipment for cleaning, and servicing and to overcome atypical clearance issues.

Additional sizes available.

Ref # 80010

GM-2.50-.625-11-3.00

CUSTOM FOODSERVICE & INDUSTRIAL NEEDS

Custom Glides

KEGlides design allows for maximum flexibility, and the applications for manufacturing are endless. Talk to us about your unique needs for institutional use, warehousing and installation.

Recessed Glides*

We also stock a full line of patented recessed glides for end users to assist your staff with moving heavy equipment for frequent cleaning and servicing.

* Conversion Kit required for NSF compliance.
